

Student ZERO VOC Collection

# 1 litre bottles

Why did we spend over 2 years reformulating our collections? They still boast their incredible, vibrant pigments, and the viscosity remains for truly excellent mixability. But what's the game-changer? These are not just acrylics; they are the future of art for our safety and the health of our planet.

Exposure to VOCs can lead to a myriad of adverse health effects – from irritation of the eyes, nose, and throat to headaches, increased asthma attacks, allergies, infertility, damage to the central

nervous system, behavioural and learning difficulties, and even cancer. Think back to a time when allergies were rare – our art shouldn't come with such hazardous consequences.
